

MAP 15 - PERCENTAGE OF SUB-CATCHMENT UNIT SUBJECT TO INTENSIVE LANDUSES FOR THE NORTHERN NRM REGION

NRM North Map Description	
NAME	PERCENTAGE OF SUB-CATCHMENT UNIT SUBJECT TO INTENSIVE LANDUSES FOR THE NORTHERN NRM REGION
Date Source/s	Land Use data: Land Use Map for Australia (DPIW, 2003), Provisional TASVEG 2005 (DPIW, 2008). Catchments: CFEV catchments (DPIW, 2004).
Description and Uses Summary	<p>Three classes have been extracted from the land use data from Map 15: Plantation, Built Environment and Irrigated Agriculture (data limitations are discussed on Map 15).</p> <p>The area statement for each of these land use classes were summed for each sub-catchment unit and then calculated as a percentage for intensive cover for each sub-catchment unit. The resulting index allows for a comparison of relative intensity of land use of the region.</p> <p>Note: for small partial sub-catchments on the boundary of the NRM region, only the sub-catchment area inside the region has been used for calculations. This may mean that in areas of the sub-catchment outside NRM North, the percentage intensive use may be more or less.</p>
