

MAP 19 - INDICATIVE SALINITY HAZARD IN THE NORTHERN NRM REGION

NRM North Map Description	
NAME	INDICATIVE SALINITY HAZARD IN THE NORTHERN NRM REGION
Date Source/s	Groundwater Flow Systems of the Midlands (DPIW, 2007)
Description and Uses Summary	<p>This map shows the total salinity-hazard for the area mapped. The data is an output from the Municipal Salinity Hazard Assessment project (and therefore may not include areas outside the NAP region). The total salinity-hazard is calculated using the salt storage field (saltstor) and the rainfall field (rainfall below 800mm-pa).</p> <p>The data should only be used for its designated purpose (regional salinity hazard estimation) and not used beyond 1: 100,000 scale.</p>
